

# TRIO Upward Bound Summer Program

## College Campus Living Experience

During the Summer Program, students live in the Finlandia University dorms Monday morning through Friday afternoon. Students share a room with one roommate and a bathroom with two additional suite mates.

## Prepare for Next Year

Each student is placed in courses that will prepare them for the material they will encounter in the fall, giving them a boost to excel in their high school classes. High school graduates who are enrolled for college in the fall can take TRIO UB's Bridge classes in Communication and Humanities and earn free, transferable college credits.

## Fun Evening Activities

While enrolled in the summer program, students partake in community events, local recreation and other planned group activities like laser tag, beach time, bowling, movie nights, hiking and more.

## Relationship Building

Students from nine high schools in Baraga, Houghton and Keweenaw counties attend TRIO UB's Summer Program. Students form lasting friendships with students they normally would not see during the school year.

## Resume Building through Service Projects

Students partake in various service projects throughout the summer. These opportunities allow students to make relationships with community members and organizations while building their resume. Students may count TRIO UB service hours for school or other organization requirements, per their allowance.

## Major City Travel

At the end of five weeks on campus, TRIO UB brings summer program students on a weeklong trip to a major U.S. city. During the trip, students tour colleges, museums and major attractions. The trip is truly the highlight of the year for many students.
